### **MITIGATION CREDIT FILING**

On Monday, November 26, 2007, the Association mailed the January 2008 rewrite notices. We apologize for the delay, but we were waiting on approval of the mitigation credits required by H3820.

Unfortunately, we have not received approval as of today, but we feel that you need to have the rewrite notices now.

The January 2008 rewrite notices anticipate the approval of the mitigation credits. The following credits have been filed:

- IBHS Fortified Home for Safer Living Credit – The filing requests an increase from 10% to 20% for Fortified Homes.
- SC Safe Homes Credit – Dwellings and manufactured homes completing the SC Safe Home Program process will receive a 5% credit if approved.
- Impact Resistive Windows – Risks in the commercial program with impact resistive windows will receive a 5% credit if approved.

Additional information will be distributed when the mitigation credit filing has been formally reviewed by the Department of Insurance. These credits are NOT available until formal approval is received.
